NATIONAL SYNCHRO9
Parents & Athletes Briefing

One-page summary for those who missed the briefing

Core message: Synchro9 is not nine individual skaters sharing the ice. It is **nine athletes functioning as one synchronized unit** - built through timing, spacing, formation accuracy, speed control, trust and unison.

1. Vision & Pathway

Bayu Blades is Malaysia's national Synchro9 development identity. The aim is to build a sustainable Junior/Senior pathway, not a one-off team, with progression from **recruitment -> assessment -> development -> team formation -> choreography -> competition preparation -> international exposure**. Competition plans depend on athlete readiness, ice availability, coaching plans and opportunities.

2. Selection Is Continuous

Selection is not based only on jumps or singles results. Coaches assess **skating skills, synchro ability, timing, speed control, spatial awareness and consistency**, together with **attendance, commitment, coachability, attitude, teamwork and reliability**. Programme membership does not automatically guarantee a competition place.

3. Training Expectations

Training may include on-ice formation work, off-ice conditioning, choreography/music timing, video review, homework and team briefings. Athletes should arrive prepared, apply corrections, stay focused, communicate unavoidable absences early, and manage recovery and school commitments. **One absent skater affects the whole team.**

4. Athlete Standards & Safe Sport

The culture is built on **respect, commitment, discipline, teamwork, accountability and professionalism**. Bullying, harassment, humiliation, intimidation, gossip, hostile cliques, deliberate exclusion, serious disrespect, repeated non-commitment, retaliation or leaking confidential team matters are unacceptable. Genuine welfare or safeguarding concerns should be raised through the proper ISAM channel.

5. Parents' Role

Parents are asked to support the athlete, coaches and team; help with punctual attendance; encourage independence; communicate scheduling issues early; and avoid negative comparisons. Do not lobby for positions, pressure coaches through WhatsApp, confront another minor, or create parent factions.

6. Communication Channels

Routine matters: Team Manager
Technical matters: Coaches
Welfare / safeguarding: designated ISAM channel
Official administration: ISAM
WhatsApp is for official updates, attendance, schedule changes and practical coordination - not arguments, criticism, gossip, screenshots or personal attacks.

7. Costs, Travel & School

Selection does not mean every cost is funded. Possible costs include ice, coaching, costumes, entry fees, camps, travel, accommodation and visas. Preliminary October 2026 fees shown were **RM40 per off-ice class** and **RM50 per on-ice class**, subject to confirmation. For international trips, athletes must follow delegation rules; school leave, passports and visas should be planned early.

8. What Happens Next

Confirm athlete/parent contacts; sign the Code of Conduct and parent acknowledgement; confirm training schedule and attendance expectations; provide medical/emergency information where required; proceed with assessments and development squad planning; then confirm camps, seminars and competition opportunities when ready.
